**Great Backyards Magazine Profiles Innovative Pool Landscaping By Beechwood Landscape
Architecture and Construction, LLC**

SOUTHAMPTON, NJ – July 10, 2009 – A leading New Jersey landscape architecture company, Beechwood Landscape Architecture and Construction, LLC has been featured for pool and landscaping excellence by Great Backyards Magazine.

Great Backyards Magazine is a biannual publication that provides readers with expert solutions for all landscapes. The May/June 2009 issue featured three of Beechwood Landscape's completed pool landscaping projects. The projects were profiled for their exceptional water features, innovative solutions to architectural challenges, and noteworthy paths, patios, and structures.

Steve Chepurny, President of Beechwood Landscape and Certified Landscape Architect, attributes the appeal of the spaces to meticulously planned, detailed designs. "The outdoor living space is its own ecosystem, with a unique environmental feel. In working with our clients to conceptualize and implement the landscape design, we were very careful to select materials and plantings that worked together within the flow of the existing space," Chepurny reports.

The outdoor spaces profiled by Great Backyards Magazine featured lush plantings and inventive architectural design of custom spas, waterfalls, patios, fire pits and exterior bars and cook stations.

"Each of these spaces has a unique 'wow' factor that truly unites beauty with usability. Perhaps the best example of this is the outdoor kitchen. Indoors, the kitchen is the hub of the home from which all things flow. When we design an outdoor bar or cook station, we work to recreate this effect. The result is an outdoor living space that truly integrates with the home," explains Chepurny.

According to Chepurny, Beechwood Landscape continues to see a strong demand for landscape design projects and hopes to be profiled in future issues of Great Backyard Magazine.

About Beechwood Landscape Architecture and Construction, LLC

Beechwood Landscape Architecture and Construction, LLC was founded in March of 2006 by Steve Chepurny, Certified Landscape Architect (CLA) and Tim Worrell, Certified Nursery and Landscape Professional, (CNLP).

An innovator in the industry, Beechwood employs a growing staff of Landscape Architects, Designers, and Horticulturists with diverse expertise in masonry construction, property maintenance, landscape installation, exterior low voltage lighting, and irrigation. Beechwood specializes in designing outdoor living spaces that are seamlessly integrated into the residential property including exterior kitchens, custom gunite pools, masonry terraces, exterior fireplaces, putting greens, landscape, custom lighting, and custom pavilions.

Since its inception, Beechwood Landscape Architecture and Construction, LLC has been the recipient of sixteen industry awards from the New Jersey Nursery and Landscape Association (NJNLA), the Northeast Pool and Spa Association (NESPA), and The Builders League of South Jersey (BLSJ).
